Skills

Backend Development

Database Concept

REST API Concepts

Version Control

Python Programming

Basic Frontend

Profile

Computer Engineering student with strong Python fundamentals and a growing foundation in both frontend and backend development. Currently learning Django, REST APIs, and relational database design, with hands-on experience building backend systems and understanding how databases integrate with applications. Seeking a full-stack developer internship or junior role to gain practical industry experience and strengthen end-to-end development skills.

Education

Bachelor of Computer Engineering

2022 – Present

Tribhuvan University

Advanced College of Engineering

+2 Science

Graduated 2021

NIST, Kathmandu

Projects

Task Manager REST API

Django, SQLite

- Built a RESTful backend API to create, view, update, and delete tasks
- Designed database models and handled HTTP request-response flow
- Returned structured JSON responses following REST principles

Terminal Typing Speed Test

Python

- Built a terminal-based typing speed test in Python using the `curses` library with zero external dependencies.
- Implements real-time WPM calculation and character-level accuracy tracking with color-coded feedback.

Medical Chatbot

Python, Machine Learning

- Developing an NLP-based chatbot for basic medical queries
- Implementing data preprocessing and response generation
- Gained experience in Python programming and structured data handling
